

Sustainable Cencosud

A business connected to our environment and adapted to the challenges of the future

Editorial

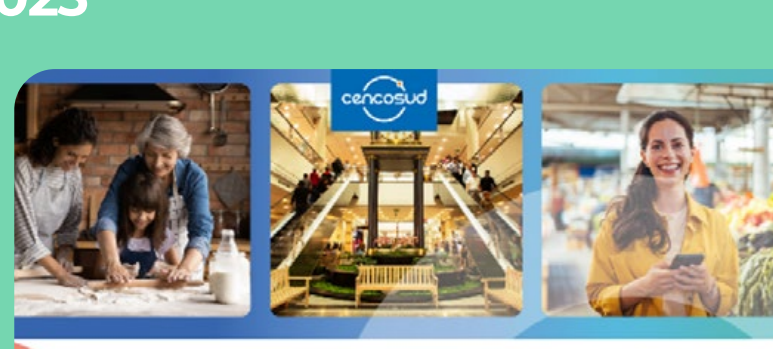

We begin this first quarter of 2024 with significant advances. Under the pillar of **Corporate Governance**, we published our Integrated Report 2023, reflecting the Company's annual results. During this period, we also highlight, within the strategic pillar **Planet**, the alliance with the startup Cheaf, which already has a presence in 125 locations in Chile, helping to prevent over 320 tons of food from being wasted. In the **Product** pillar, Supermercados Chile launches a new product under the Circular Economy model: Trout (a freshwater fish) fed with organic waste from our operations. In the realm of the **People** pillar, we highlight the multiple initiatives we undertook to commemorate Women's Month at Cencosud. Our female collaborators are a fundamental part of our team, comprising over 50% of the total.

María Soledad Fernández
Investor Relations and Sustainability Manager Cencosud

#CencosudPeople

Women's Month

At Cencosud, during Women's Month, we commemorated our employees through different experiences addressing topics of interest, such as breast cancer, women and happiness, and the advances and challenges of women in Latam. In addition to the recognition of some of them, who through their role highlight and inspire the Cencosud DNA every day.

- > 8 Talks with **2,279 participants**
- > 2 Meetings with **71 participants**
- > Awards ceremony with **7,522 participants and 390 women recognized for their work**
- > Internal activity with **624 participants**
- > Conversation panel with **120 participants**

Cencosud and Cheaf, together against Food Waste

Six months after the alliance with Cheaf, Supermarkets Chile has managed to improve pre-waste management, preventing tons of food from becoming waste.

Increase in recyclability

During 2023, we had a 22% increase compared to the previous year in tons of packaging materials of our private labels, designed to be recycled.

Considering aluminum cans, tinfoil, recyclable plastics, cardboard, paper, beverage cartons, glass, and wood, which can be recycled by our customers.

Years	2022	2023
Total - tons of material	15.999	19.950
% variation from the previous year		22%

Cooking Oil Recycling

Prezunic, in partnership with the "Renew the Environment Action" program and the supplier Cargil, implemented the collection of cooking oil in 10 Biodiesels to be transformed into Biodiesel, a cleaner and renewable fuel.

#CencosudProduct

Circular Offer in Supermarkets Chile

In the Circular Offer product line, Supermarkets Chile includes in its variety of products the Trout from the supplier Caleta Bay, which was fed with larvae from Food for the Future (F4F), with which we manage our organic waste.

This product is added to the Circular Eggs made available with Ecoterra in 2023.

HACCP Certification

The Vespucio Distribution Center in Chile receives an important HACCP certification, endorsing the commitment to quality and excellence in the supply chain, with hazard analysis and critical control points that distinguish food safety in production processes worldwide.
